

Highest efficiency for all bale types in all machines!

TRIOPLUS[®] 1900 RS
2400 RS

A slim everyday hero

Trioplus[®]

– Makes you more efficient!

- ✓ Optimized for both round and square bales
- ✓ Proven with low silage losses - DM losses down to 1%!*
- ✓ PreTech film - Goes thinner but with same or better performance than 25μ
- ✓ Less material usage per bale - Saving both cost and environment
- ✓ More meter per reel - Increased output per day
- ✓ 1900 meters with charity colors - Efficiency for a good cause!

**Test by Swedish University of Agricultural Sciences (SLU) 2016*

PRODUCT DATA			
Dimensions	Reels/pallet	Color	Specific benefits
750 mm x 0.021 mm x 1900 m	15	White, eco-green, green, black*	1900 m film per reel enable you to wrap up to 27% more bales than with 1500 meter reels! Fits in all machines and works for both round & square bales!
750 mm x 0.021mm x 2400 m	16	White, eco-green	2400 m per reel give you the highest efficiency for square bales in the market! Increase your efficiency by 60% compared to 1500 meter reels. Use our balewrap guide for applicable machines.

All products come with premium water protected paper core and 12 months UV-protection.

Packaging: 1900 m - Box or Contractorwrap® Packaging Solution. 2400 m - Only Contractorwrap® Packaging Solution.

**Charity edition: pink, blue, yellow*

Trioplus[®] 1900 RS & 2400 RS - Silage quality tested products

One part of our product development is to secure that our films gives a high silage quality. Trioplus 1900 RS & 2400 RS have been tested by SLU (Swedish University of Agricultural Sciences) in field for evaluating the silage quality compared to our premium 25μ film. Studies have proven that using Trioplus 1900 RS & 2400 RS give the same or an even better silage quality than our premium 25μ film. For example, dry matter losses have been proven to be down to 1% where as the general losses in baled silage is considered to be around 3-5%.

This proves that the thinner PreTech films have the same or even better properties than our premium films. For more information about our SLU tests please visit triowrap.com.

In the end of the day it's the value of the silage that counts!

More Bales – Less Work

Perfect solution for both round and square bales!

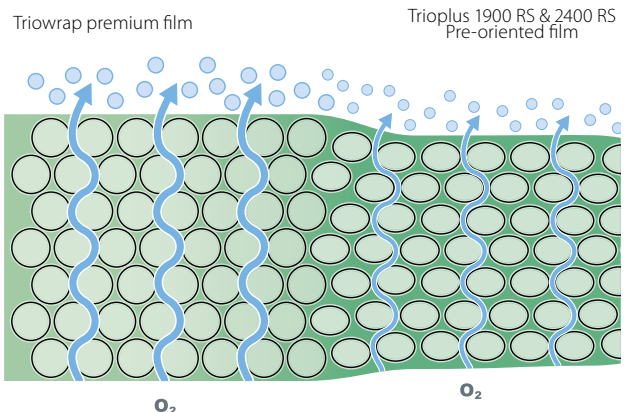

PreTech® – The unique technology for a perfect thinner premium film

PreTech is our name of a number of technology innovations by Trioplast that combine a special blend of raw materials, unique manufacturing processes and over 50 years of knowledge and silage expertise in different processes to achieve products with improved efficiency for end-users.

Your benefits with **PreTech®**:

- ✓ Optimized wrapping and ensiling properties
- ✓ No compromising on fodder quality
- ✓ Less environmental impact
- ✓ Best, economical silage

Trioplus products are delivered with following support:

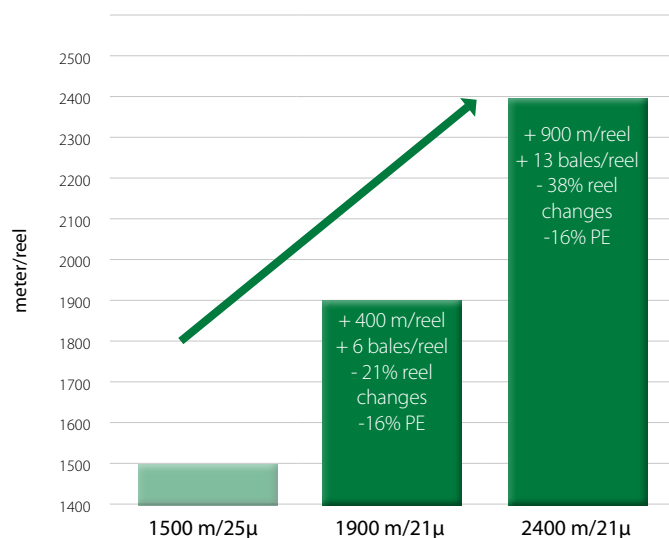

- General questions regarding baled silage making
- Recommendations in maintenance of bale wrappers
- How to increase your efficiency
- Introduction of products in machine
- Guidance in sustainable baling with our Triogreenway

Trioplus enables:

- ✓ Excellent tear strength
- ✓ Minimal air permeability
- ✓ Smooth bale surface
- ✓ Very good adhesion
- ✓ Minimized disposal costs due to a thinner and more efficient film
- ✓ Higher daily output
- ✓ Suitable for all bale and machine types

Higher efficiency – Save time & money!

Based on: Round bale 1,20 m, 6 layers of film, 55 % overlap, 70 % pre stretch, when comparing 1500 m/25µ film.

Trioplast – We keep our promises!

Reliable

Solid | Durable | Experienced Team | Long-term Partnerships | Confident | Fair | Care for the Environment

Active

Constant dialogue with Customers & Partners | Leading Innovator | Continuous Process Development | Silage Service & Support

Trioplast is an industrial group with a little over 1,000 employees and a turnover of EUR 430 million. The Group is one of Europe's leading players in innovative and cost-efficient packaging solutions based on polyethylene film. The company's registered office is in Smålandsstenar in Sweden. It operates production facilities in Sweden, Denmark and France and sells its products to a global market. The principal owner of Trioplast is Altor Funds.

WE DESIGN FOR THE FUTURE

As a leading producer of polyethylene film, at Trioplast we take responsibility for the environment in everything we do. We strive to reduce the amount of material in our products, we recycle and reuse waste materials, and we continuously develop our expertise so as to decrease our use of non-renewable raw materials.

In short: We design sustainable solutions for the future.
