

**Tried and tested a million times!**

**TRIOWRAP<sup>®</sup>**

The Original

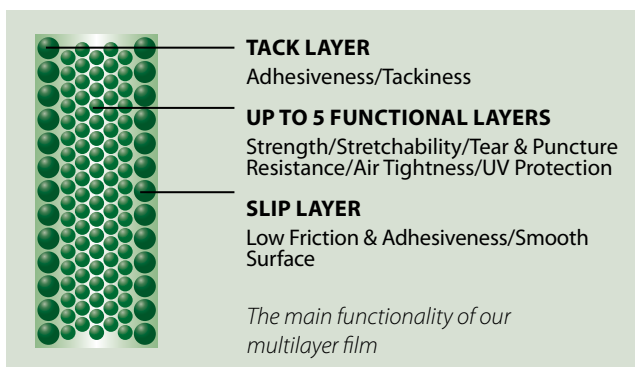

# TRIOWRAP®

## Tried, Tested, Proven

Triowrap® was introduced in the late 1980's and is our most used silage film. Trioplast has a long background within the industry of polyethylene, and Triowrap® is well tested by contractors, machine manufacture's, independent research institutes and SLU (Swedish University of Agricultural Sciences). The premium film Triowrap® offers you highest reliability due to best running performance on all wrappers as well as ideal characteristics for securing the valuable feed.

Premium multilayer blown film with high adhesive and stretching properties!

Many years of experience and gained knowledge regarding the requirements of baled silage and the production of film as well as the carefully selected PE raw materials and additives made this unique blown film possible. Multilayer construction and a blend of a high number of components ensure the important features for a silage film as adhesion, bonding, stretching, colour, tear-strength, UV-protection and a smooth surface.

**TIP:** Lighter colours reflect the sunlight resulting in a lower and more stable temperature in the bale and therefore enables a better silage quality!\*

\*Studies by Swedish University of Agricultural Sciences.

RELIABLE

THE ORIGINAL

**Our Balewrap Guide:**  
Find the best and most efficient film  
for your wrapper easily online at:  
[triowrap.com](http://triowrap.com)

### Your Reliable choice:

- Usage of best raw materials for a consistent quality, even under extreme conditions as high temperatures, windy, dusty environments and high humidity.
- Excellent stretchability and elasticity for airtightly wrapped bales with permanent protection.
- Can be used on all types of wrappers.
- High **pre stretch level up to 80%** makes the film more efficient due to more bales per reel and hour.
- Less burden on environment and resources because of the high quality components and additives in the film. Film and core are recyclable.
- The high adhesive power of the film seals the valuable crop hermetically.
- When properly stored the reels can be used for more than one season.
- High UV-protection for at least 12 months after wrapping, also for southern regions.
- Waterproof, tried and tested **plastic core**.
- Best silage quality due to perfect air tightness.
- Worldwide leading in market and quality – farmers in more than 50 countries rely on Triowrap.

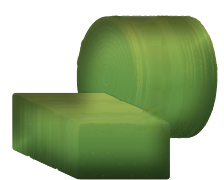

### For round and square bales!

#### PRODUCT DATA

500 x 0.025 mm – 1800 m, 24 reels/pallet  
750 x 0.025 mm – 1500 m, 15 reels/pallet  
750 x 0.025 mm – 1700 m, 15 reels/pallet\*

#### Available in the colours:

White, Eco Green, Green, Black

\*Contractorwrap® Packaging.

**PROVEN FOR  
DECADES**

**FEED EFFICIENT**

# Trioplast – We keep our promises!

## Reliable

Proven | Trustworthy | Efficient | Safe | High Quality  
Authentic | Economic | Dependable | Supply Capability

## Long-term

Solid | Durable | Experienced Team | Long-term Partnerships | Confident | Fair | Care for the Environment

## Active

Constant dialogue with Customers & Partners | Leading Innovator | Continuous Process Development | Silage Service & Support

Trioplast is an industrial group with a little over 1,000 employees and a turnover of EUR 430 million. The Group is one of Europe's leading players in innovative and cost-efficient packaging solutions based on polyethylene film. The company's registered office is in Smålandsstenar in Sweden. It operates production facilities in Sweden, Denmark and France and sells its products to a global market. The principal owner of Trioplast is Altor Funds.

## WE DESIGN FOR THE FUTURE

As a leading producer of polyethylene film, at Trioplast we take responsibility for the environment in everything we do. We strive to reduce the amount of material in our products, we recycle and reuse waste materials, and we continuously develop our expertise so as to decrease our use of non-renewable raw materials.

In short: We design sustainable solutions for the future.
