

Innovative mantle film for increased silage quality

TRIOBALE[®]
compressor

Take your silage to the next level

TrioBaleCompressor[®]

This is TrioBaleCompressor[®]

- ✓ 10-30% higher output per reel compared to other brands - lower cost per bale!
- ✓ High stretch possibilities – Enables optimal efficiency and tear resistance on bale!
- ✓ Patented elastic properties – Unique strength for heavy duty baling
- ✓ One piece packaging with edge protection for easy handling
- ✓ Increases the silage quality according to independent tests*

*Test by Swedish University of Agricultural Sciences (SLU) 2015

| PRODUCT DATA | | |
|-------------------------------|---------------------|---|
| Dimensions | Stretch in machine* | Specific benefits |
| 1280 mm x 0.013 mm x 3000 m | 5-13% | Perfect for stationary machines - many bales between reel changes. 25-30% increased output compared to other brands. |
| 1280 mm x 0.016 mm x 2400 m | 15-20% | Perfect combination for mobile and stationary machines for edge to edge. 25% increased output compared to other brands. |
| 1400 mm x 0.016 mm x 2200 m | 18-30% | Superior product for mobile balers for professional use and possibility to cover edge. 20% increased output compared to other brands. |
| 1400 mm x 0.016 mm x 4500 m** | 18-30% | Highest efficiency with minimum downtime. For applicable machines please visit triowrap.com |
| 1400 mm x 0.020 mm x 1800 m | 25-35% | Heavy duty product for mobile balers for all type of users with possibility to cover edge. 10% increased output compared to other brands. |
| Colour | Reels/pallet | |
| Tinted white | 16 reels/pallet | |
| | **9 reels/pallet | |

*Stretch levels for each product is visible on the reel label

TrioBaleCompressor[®] and Trioplus[®] - A superb combination!

By using a combination of our products based on the PreTech[®] technology platform, each bale of silage you produce has the best possible foundation for efficient baling, high silage quality and lower cost for your silage.

- ✓ Less wrinkles - perfect seal of the bales with high silage quality proven by University*
- ✓ Perfect bale shape for easy bale handling and storage
- ✓ Less material usage per bale – Saving both cost and environment
- ✓ Trioplus reel length up to 2600 m – Less reel changes for efficient baling

Superior protection of TrioBaleCompressor with our one piece packaging concept!

Unique patented product packaging

- Edge protection for safe reel handling
- 100 % recyclable PE – can be recycled with bale wrap
- Unwinding direction on packaging for convenient loading
- One piece packaging for efficient reel changes
- Stretch levels of product on the label

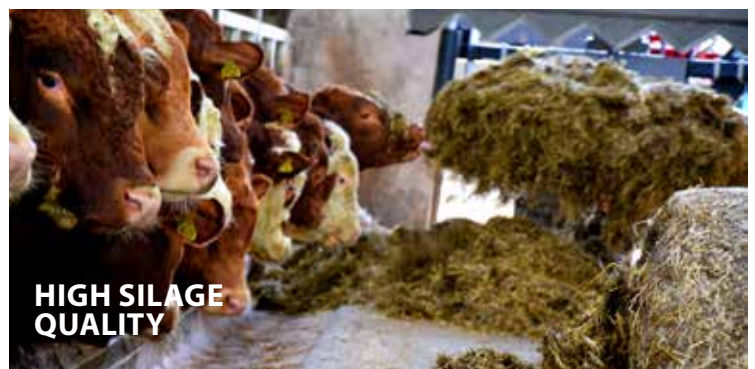

Improve your silage quality with TrioBaleCompressor

Trioplast has done silage tests in cooperation with the Swedish University of Agricultural Sciences (SLU) for several years. For example, we have tested different combinations of stretch film layers on bales done with mantle film and compared those to bales done with net. Conclusion of the study showed that replacing net with mantle film resulted in better shaped bales, better airtightness and less mould. But reducing the number of stretch film to 4 layers is not recommended.

WHY USING MANTLE FILM

- › Mantle film and bale wrap can be sorted in the same recycling fraction
- › Easier to open for efficient use with an automatic bale opener
- › Easier to open frozen silage bales during winter
- › Compact bales that are easier to handle with bale handler
- › Less risk of puncturing film layers during wrapping
- › Protection of the mantle side reduces mould

Trioplast – We keep our promises!

Reliable

Proven | Trustworthy | Efficient | Safe | High Quality
Authentic | Economic | Dependable | Supply Capability

Long-term

Solid | Durable | Experienced Team | Long-term Part-
nerships | Confident | Fair | Care for the Environment

Active

Trioplast is an industrial group with a little over 1,000 employees and a turnover of EUR 430 million. The Group is one of Europe's leading players in innovative and cost-efficient packaging solutions based on polyethylene film. The company's registered office is in Smålandsstenar in Sweden. It operates production facilities in Sweden, Denmark and France and sells its products to a global market. The principal owner of Trioplast is Altor Funds.

WE DESIGN FOR THE FUTURE

As a leading producer of polyethylene film, at Trioplast we take responsibility for the environment in everything we do. We strive to reduce the amount of material in our products, we recycle and reuse waste materials, and we continuously develop our expertise so as to decrease our use of non-renewable raw materials.

In short: We design sustainable solutions for the future.
